Problem Encountered and Resources Required:

Students are working to achieve perfect development. Educated students are important for development. That is why the work of developing such students is seen in colleges. Applauding students on the back, looking at their latent qualities, is what makes them rank. Therefore, it is necessary to look for meritorious students, so it is important to look for such meritorious students first. That is why it was decided to select the meritorious from all the faculty first. The criteria and eligibility for the same were decided and the list was prepared by selecting the meritorious students accordingly. After making this list, the date of meritorious student award distribution program was fixed for the merit of the students. The nature of the award was determined as cash and certificate and the financial provision for it is important. For this, the principal, professors and non-teaching staff of the college were appealed to all the elements and the plan was shaped by the response to this call. The above factors had to be considered while actually shaping the plan. This plan can be fruitful so that education does not stop due to financial problems.
